PREFACE

THIS DIRECTORY has been compiled and made public through our assiduous labour and constant effort upon a profound approval and a unanimous support of the various Chambers of Commerce and Manufacturers as well as traders in Japan, and it is chiefly intended for the use of reference for the foreign merchants who are anxious to start business relationship with this country.

As advertisers in this Directory, comprise the names of concerns whose business stability and credit enjoy a favourable reputation among the parties concerned, and who are eager to extend their activity to every quaters of the Globe, we presume, it is the most safe and profitable means in negotiating transaction, for foreign importers and exporters wishing to do business with Japan, first to refer to the advertisers enumerated herein, so as to expediate business arrangement.

Hoping this little book may facilitate the development of trade of this country with foreign countries abroad.

“TEIKOKU TSUSHO KYOKWAI”

(The Imperial Trading Association)

A Word to Foreign Exporters and Importers

The Imperial Trading Association had been established since 1914 A.D. under the auspices of the most predominant Manufacturers and Merchants engaged in foreign trade in every parts of Japanese Empire, and its members now stand at three hundred and more.

The sole object of this Institute being always to endeavour for the extention of business towards to foreign countries, besides publishing the Directory for the consideration of benefits of those desiring to open transactions with our country, we have newly organized a department under style of—"Kaigai Torihiki Shokaibu"—which may be translated into Foreign Transaction Inquiry Section, and are ready to offer our humble services GRATIS to give best possible assistance in securing good and profitable connections between parties concerned.

Those foreign merchants, therefore, intending to do business with Japan, shall avail this opportunity in writing at once, giving the description in detail of the articles wanted (if any, samples affixed) to us; in that case, we shall promptly and faithfully select the most suitable concerns and recommend them which may deserve your full satisfaction.

All communications (duly registered) shall be addressed to

**KAORU MARUKUNI,
Teikoku Tsusho Kyokwai.**

of

PFERMIN.

This is a nutritious tonic made for the purpose of the reformation of constitution and the promotion of energy for every feeble person being attacked by nervous debility and the decline of energy. As this drug contains a proper quantity of digestive albumin, carbohydrate, organic iron and phosphate of lime it is effective for pregnant and suckling whom to accelerate the growth of embryos and sucklings.

MALT-SOUP-EXTRACT.

This is a specific for the baby's constipation which is remedied gradually by this article.

It is dangerous by giving babies any sort of drugs or by clysterise when they feel pain incessantly or temporarily owing to constipation except the treatment of the regulation of stomachs and intestines in order to accelerate the natural dejection as it is apt to enfeeble babies. This nutriment is truly fit for this purpose.

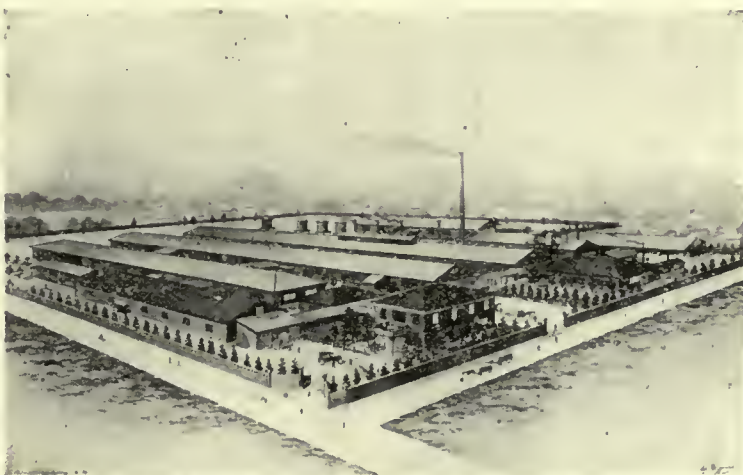

K,O COUGH BONBON.

This drug is welcomed every-where as it is made sweet and fragrant like common cake and brings about no by-process, suitable for the aged and children who always dislike bitterness and bad smell of drugs; it has a peculiar efficacy to quiet cough and to clear phlegm.

KINOMEAL.

Is a triumph of modern science. It is prepared by adding phosphates, lime, etc. to fresh milk. It contains all the ingredients essential to the digestion and absorption of infants in the most favourable form for new-born infants, to instead of the mother's milk.

The carbohydrates are unlike milk-sugar or acid-fermentation in the quantity. "Kinomeal" does not cause diarrhoea. An infant invariably gains in healthy development.

Yodobashi Factory (Tokyo)

modern scientific research. maltose, dextrine, phosphates, lime, and cow's milk, and it is essential to the nourishment of infants in the most favourable form. Thus it is an ideal food for whom it may be given instead of the mother's milk.

contained in "Kinomeal" does not cause diarrhoea. An infant invariably gains in healthy development.

NURTLOGEN.

It is an important matter to maintain more nutritious value than that of the mother's milk by adjusting and supplying its ingredients when it occurs to feed the baby on cow's milk.

This article is created so fitly for this purpose that it makes the baby's growth accelerate exceedingly, especially when babies hurt their stomachs and intestines, it is to be absolutely avoided to feed them on sugar or starchy food; in this case it is clever enough to depend upon this article, as physicians declare.

GALACTOSAN.

This is the only nutrimental nurture that is used by physicians in those diseases as indigestion, acute or chronic diarrhoea of the baby, and is effective for the stoppage of diarrhoea and also for the supply of nutrition; in such cases, other nutrimentals are unworthy for remedy at all.

It is an excellent article recommended and praised by all specialists in pediatrics in these days and any one must provide against the emergency always putting it in stock in all homes where suckling are brought up.

SICCAROL.

This is the newest drug made for the remedy against such skin diseases as prickly heat, sore, itch etc. we often find that the slightest injury on the baby's skin frequently gives rise to the fearful invasion of poison. This drug is a reserve one which is necessary for all homes, having strong germicidal power additionally a recovering one for all the disorder of skins.

|---|-----------|--------|----------------|---|-----------|--------|----------------|
| | | | <i>Yen</i> | | | | <i>Yen</i> |
| GROUP IX. | | | | | | | |
| *Tissues and Manufactures thereof | | | | | | | |
| <i>Note.</i> —1. The term "tissues" in this group includes felts and knitted tissues. | | | | | | | |
| <i>Note.</i> —2. The term "silk" in this group includes artificial silk. | | | | | | | |
| <i>Note.</i> —3. In case a tissue in this group is constituted of more than one kind of fibre, any kind of fibre which does not exceed 5% by weight of the tissue shall not be considered as mixed in reference to the tariff classification, silk and artificial silk excepted. | | | | | | | |
| <i>Note.</i> —4. The number of threads constituting the tissues shall be counted by elementary threads in the part where the greatest number of threads are used. | | | | | | | |
| <i>Note.</i> —5. Figured tissues are those with a design or repeat constituted by interlacing both warps and woofs more than 20 in number. In case of counting number of threads aforesaid, twisted yarn consisting of two or more single yarns, or yarns put together to act as one shall be counted as one. | | | | | | | |
| Explanations made in the course of the negotiations for the Anglo-Japanese Treaty:— | | | | | | | |
| Note 4 of Group IX of the Japanese Tariff is intended to apply to the counting of threads constituting such tissues as having figures, stripes, or other designs. In case the number of threads is unequal in different parts of one piece, owing to imperfection in weaving, the mean of the number of threads in several parts of tissue will be taken for the purpose of tariff classification. Fractions of threads, that is, threads which touch one of the sides of the counting-glass along its whole length, will not be counted. | | | | | | | |
| "Elementary threads" in Note 4 means single threads—for instance, a twofold yarn would be counted as two threads and not as one | | | | | | | |
| <i>*According to the Textile Consumption Tax Law, textiles are subject to consumption tax of 10% of the value thereof.</i> | | | | | | | |
| | | | | thread—and does not mean those particular threads in the body or bulk of the cloth which are commonly known in England as "elementary threads." Consequently, in counting threads in tissues which have a design or border, the "elementary threads" would be counted wherever they happen to be most numerous, whether it be in the design or border or in the body of tissue. | | | |
| | | | | As regards Note 5, the correct interpretation is that a figured tissue, such as would pay duty under NO. 298(8), is one which has a design or repeat constituted by interlacing more than 20 warp threads with more than 20 woof threads. For the purpose of counting the said threads, twisted yarns consisting of two or more single yarns, or yarns put together to act as one, would be counted as one thread. It is clear, however, that this method of counting would only be used in ascertaining whether a tissue should pay duty as a figured tissue or not, and not for the purpose of counting threads as set forth in Note 4. | | | |
| | | | | (298) Tissues of cotton:* | | | |

*Metal in lumps, ingots, bloom, billets, and slabs produced in and exported from Chosen (Corea) are exempt from import duty on and after the 15th of April, 1916, according to the Law No. 26 of the same year.

†Explanations made in course of the negotiations for the Anglo-Japanese Treaty:—

‡The term "iron" in No. 462 of the Customs Tariff includes both iron and steel.

TOKIWA CO., LTD.

TOKYO, JAPAN.

TOKIWA CO., is a limited liability concern of **¥5,000,000** with paid up capital of **¥1,750,000**.

The name was originally "**Nitto Shokai**," then working only for Liverpool & London & Globe Fire Office as their agent.

It was in 1910 when Mr. Goro Matsukata, the present president took over the business carried on by "**Nitto**," then the title was changed to "**Tokiwa**" meaning literally everlastingly green (as pine tree). Perhaps "constant" may be the better translation to convey the meaning.

Since Mr. Matsukata's presidency, there has been a remarkable expansion of business. Besides, Liverpool & London & Globe, later South British, New Zealand, Scottish Union Fire Offices and New Zealand, Phoenix Marine Offices have appointed the firm as their agents respectively.

For this success, Mr. Matsukata's influence has been a great factor: for his experience as business man extends over many years to various branches of industry, such as Kawasaki Dockyard, Muroran Steel Works,—one of the formost enterprises in Japan in which English and Japanese capitals are combined,—and Toyo Sugar Mill Co.

Besides this personal experience, his family influence is no less the contributor to the success of the firm: he is one of the sons of Marquis Matsukata, the Naidaijin (the keeper of the Privy Seal), one of the elderly statesmen, and who was many times the premier of Japan, making his fame by his financial administration and monetary reform of 1898. Besides the agency for fire and marine insurance lines, a department for commercial business was opened four years ago and remarkable business has developed already both at home and abroad.

Among others, the following are the chief articles handled by this department for export and import.

Mr. Goro Matsukata.
